

CANNABIS LEGALISATION & CONTROL REFERENDUM

INFORMING OUR VOTE

ZOOM WEBINAR

Monday 5th October, 7pm – 8pm

In October New Zealanders will vote on whether the proposed Cannabis Legalisation and Control Bill should allow recreational use of cannabis to become legal in New Zealand. If more than 50% of voters choose YES this will mean that after the election, the incoming Government can introduce a Bill to Parliament that would legalise and control cannabis. This process would include the opportunity for the public to share their thoughts and ideas on how the law might work.

This webinar aims to educate New Zealand health professionals about what the Cannabis Legalisation and Control Bill is, what it could mean for medical practice, our patients and our communities, and what we may wish to consider when voting. We endeavour to provide a balance of opinions from a range of perspectives to help inform our votes on election day. Please join us.

Moderator:

DR SHELLEY THOMSON General Practitioner
