Health assessment and admission process	ana	nsent and nesthetic/ lation process		Surgery/ dental treatment		First stage of recovery	Second stage of recovery and discharge	
60 minutes	30	minutes		45 - 90 minutes		30 - 45 minutes	30 - 60 minutes	
		Time support person/family/whānau will wait during theatre time.			60-90) mins		
		Total length o take from adn		he procedure will to discharge	_	hours		

Note: Times are approximate and may change on the day

Waiting time

The time specified in your admission pack is the time you need to arrive at the hospital/medical centre.

Please be aware that there will be a waiting period before your surgery.

We appreciate and understand that this may be difficult, especially if you or your tamariki/children have not eaten. Although we try to minimise the wait, it can be hard to estimate how long operations will take.

We suggest you bring a book or activities for your tamariki/children. Please feel free to ask kaimahi/staff for a progress update on the day.
